Employment History

Web Developer Intern, SQI ICT, Ogbomoso

AUGUST 2021

Software Developer, Statisense, Lagos

JANUARY 2024 – PRESENT

- Drive AI implementation to turn complex data into valuable business intelligence
- Build a team culture focused on creativity and high performance
- Keep our products competitive with latest technological advances
- Work with customers to understand problems and create effective solutions
- Use data analysis to improve our product features and performance

Chief Technology Officer, ILEYAH, Lagos

MAY 2023 – PRESENT

- Design technology road map that matches company goals and customer requirements
- As the Front end Engineer focused on building intuitive, user-centered experiences that move the platform forward.
- Develop features that help tenants find affordable apartments and make installment-based rent payments.
- Contribute to making real estate more accessible for the next generation—reshaping what it means to have a roof over one's head.
- As a Co-founder, deeply committed to driving the team towards it's goal and advancing the company's mission and long-term vision.
- Collaborate with a high-performing team to develop bold, innovative solutions that challenge the status quo.

Mobile Developer, Ajo Bank, Lagos

JANUARY 2022 – APRIL 2025

- Developed and maintained AJO Bank's mobile app using Flutter, ensuring seamless cross-platform performance across iOS and Android.
- Integrated secure payment gateways and loan management features to support real-time transactions and user onboarding.
- Collaborated with backend engineers to connect RESTful APIs for services like account creation, loan application, and payment tracking.
- Implemented responsive, user-friendly UI components aligned with fintech accessibility and usability standards.
- Optimized app performance and load times by applying efficient state management (e.g., Riverpod, Provider, Bloc).
- Conducted rigorous testing (unit, widget, and integration tests) to ensure reliability and reduce bugs in production.
